

JOSELYN SAAVEDRA

Backend Developer | Node.js | Python | APIs REST | SQL / NoSQL

Quito, Ecuador | Remote | github.com/Witch19

+593 99 252 3644 | Josyfst.js@gmail.com | linkedin.com/in/joselyn-saavedra-dev

PROFESSIONAL SUMMARY

Backend-focused Software Developer with 2+ years of experience building, maintaining, and optimizing server-side applications, databases, and **REST APIs**. Strong proficiency in **Node.js**, **TypeScript**, **Python**, and **.NET**. Experienced with **SQL** and **NoSQL** databases, authentication/authorization (**JWT**), microservices, and collaborating with frontend and product teams. Skilled in troubleshooting production issues, optimizing queries, writing clean maintainable code, and delivering through **Git**, **CI/CD**, and agile workflows. Cloud exposure via **Azure DevOps**; foundational AWS knowledge.

PROFESSIONAL EXPERIENCE

Vidortec / Vigatec Chile - Backend / Full Stack Developer

October 2023 - Present | Remote (Ecuador / Chile)

- Develop and maintain backend services with **Node.js**, **TypeScript**, and **.NET** supporting scalable enterprise applications.
- Design, implement, and consume **REST APIs**; integrate with frontend and external systems.
- Manage and optimize databases (**PostgreSQL**, SQL Server, **MongoDB**); improve queries and data flows.
- Troubleshoot, debug, and resolve backend defects and performance issues in test and production.
- Implement authentication/authorization patterns and follow secure coding practices.
- Participate in testing, deployments, and code reviews using **Git**, **Azure DevOps**, and **CI/CD** pipelines.
- Maintain technical documentation and contribute to continuous system improvements.
- Support fintech operational workflows (Diners Club) with high reliability standards.

Advance Latam - Software Developer

June 2023 - August 2023 | Ecuador

- Integrated frontend applications with backend APIs; fixed defects and improved delivery quality.
- Collaborated in agile teams using Scrum and Jira; participated in peer reviews.

SELECTED BACKEND PROJECTS (GitHub)

Backend Urbanizacion - github.com/Witch19/backendUrbanizacion

Python, Django, DRF, PostgreSQL, JWT

- Designed and built scalable REST APIs with authentication, data models, and documentation.
- Applied secure access control and relational database design.

Fruit Store eCommerce - github.com/Witch19/tienda_bnk

.NET 8 microservices, REST APIs, Angular frontend

- Backend microservices architecture (ProductService, TransactionsService) with API integration.

Restaurant Backend - github.com/Witch19/complexivo_real

Python, Django, DRF, PostgreSQL

- API services for catalog and authentication supporting web and mobile clients.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Python, Django/DRF, .NET, TypeScript, JavaScript

APIs / Architecture: REST APIs, microservices, server-side design, clean code

Databases: PostgreSQL, SQL Server, MySQL, MongoDB - SQL & NoSQL

Security: JWT authentication/authorization, secure coding practices

Cloud / DevOps: Azure DevOps, Git, GitHub, CI/CD; Docker (basic); AWS (foundational)

Quality: Debugging, automated testing (Karate, k6), code reviews, documentation

Collaboration: Agile/Scrum, cross-functional teamwork, independent delivery

EDUCATION

Software Development Technology - Universidad UTE

Mechatronics Engineering - Universidad UTE

CERTIFICATIONS

- JavaScript - 180 hours (Intermediate Level)
- Advanced Git - 40 hours
- Ethical Hacking - 40 hours

LANGUAGES

Spanish: Native | **English:** Intermediate (professional reading and technical writing)
