

JOSELYN SAAVEDRA

Software Developer | JavaScript | SQL | Responsive Web | Full Stack

Quito, Ecuador | Remote

+593 99 252 3644 | Josyts.js@gmail.com | linkedin.com/in/joselyn-saavedra-dev | github.com/Witch19

PROFESSIONAL SUMMARY

Software Developer with 2+ years of experience delivering features, resolving defects, and collaborating independently in distributed teams. Strong skills in **JavaScript**, **TypeScript**, **HTML/CSS**, responsive design, and **SQL** databases (SQL Server, PostgreSQL, MySQL). Experienced in peer code reviews, backlog defect resolution, and API integration. Working knowledge of **Java** and **Vue.js** (basic), with solid transferable experience in Angular, React, Node.js, and .NET. Able to work with less oversight, estimate tasks, and deliver maintainable code.

PROFESSIONAL EXPERIENCE

Vidortec / Vigatec Chile - Software Developer

October 2023 - Present | Remote (Ecuador / Chile)

- Feature development and maintenance for enterprise web applications using **JavaScript**, **TypeScript**, and modern UI standards.
- Wrote and optimized **SQL** queries against SQL Server and PostgreSQL (CRUD operations, data validation, reporting support).
- Resolved defects and incidents in non-production and production environments with independent troubleshooting and debugging.
- Participated in peer reviews, documentation, and delivery of backlog items.
- Built responsive interfaces and performed basic cross-browser / responsive testing.
- Integrated REST APIs; collaborated remotely with less day-to-day oversight.
- Used Git, Azure DevOps, and CI/CD for version control and deployments.

Advance Latam - Frontend Developer

June 2023 - August 2023 | Ecuador

- Developed responsive web applications with TypeScript and JavaScript.
- Fixed defects, reviewed code with peers, and delivered backlog items in Scrum.
- Validated estimates through sprint planning with Jira.

SELECTED PROJECTS (GitHub)

Fruit Store eCommerce - github.com/Witch19/tienda_bnk

.NET 8, Angular, SQL databases, REST APIs

- End-to-end feature delivery: catalog, transactions, and API integration.
- Database-backed microservices with models, controllers, and migrations.

Pet Adoption UI - github.com/Witch19/pet-adoption-ui

React, TypeScript, responsive design, REST APIs

- Responsive UI with reusable components and client-side testing mindset.

Backend Urbanizacion - github.com/Witch19/backendUrbanizacion

Python, Django, PostgreSQL, JWT

- API development, SQL data modeling, authentication, and documentation.

TECHNICAL SKILLS

Required stack: JavaScript (strong); Java (basic); Vue.js (basic); SQL (strong); Oracle DB (basic/transferable SQL)

Frontend: HTML5, CSS3, SASS, responsive design, Angular, React, accessibility basics

Backend: Node.js, .NET, REST APIs; Spring / Hibernate (basic familiarity)

Databases: SQL Server, PostgreSQL, MySQL - queries, changes, data fixes

Quality: Unit/functional testing awareness, Chrome DevTools, peer review, defect resolution

Tools: Git, GitHub, Azure DevOps, CI/CD, Jira, Postman, VS Code

Working style: Independent / self-sufficient, remote collaboration, estimate validation

EDUCATION

Software Development Technology - Universidad UTE

Mechatronics Engineering - Universidad UTE

CERTIFICATIONS

- JavaScript - 180 hours (Intermediate Level)
- Advanced Git - 40 hours
- React - 80 hours (Develop Junior)

LANGUAGES

Spanish: Native | **English:** Intermediate (professional reading and writing)
