

JOSELYN SAAVEDRA

JavaScript Developer | React | Node.js | TypeScript | Code Quality & Review

Quito, Ecuador | Remote | Flexible hours | github.com/Witch19

+593 99 252 3644 | Josyts.js@gmail.com | linkedin.com/in/joselyn-saavedra-dev

PROFESSIONAL SUMMARY

Software developer with 2+ years of hands-on **JavaScript** and **TypeScript** experience building and maintaining web and backend applications. Strong command of modern ES6+ patterns (async/await, closures, modules), **React**, **Node.js**, DOM/UI work, and REST APIs. Detail-oriented debugger who writes clear technical explanations and documentation. Experienced working independently and asynchronously in fully remote settings. Daily user of AI coding tools (Cursor, Copilot, ChatGPT) with a practical eye for what makes generated code correct, efficient, and maintainable. Motivated to evaluate AI-generated JavaScript and provide structured, actionable feedback.

PROFESSIONAL EXPERIENCE

Vidortec / Vigatec Chile - Full-Stack Developer

October 2023 - Present | Remote (Ecuador / Chile)

- Develop and maintain production web apps with **JavaScript**, **TypeScript**, **React**, and **Node.js** (plus .NET).
- Write and review clean, readable code; identify bugs, edge cases, and failure points in frontend and backend flows.
- Implement async logic (Promises/async-await), API integrations, and DOM/UI behavior aligned with modern ES6+ practices.
- Document technical solutions clearly; communicate trade-offs and fixes to technical and non-technical teammates.
- Work independently and asynchronously in a remote setup using Git, Azure DevOps, and agile workflows.
- Use AI assistants daily while validating outputs for correctness and code quality before shipping.

Advance Latam - Frontend Developer

June 2023 - August 2023 | Ecuador

- Built UI features with JavaScript/TypeScript and Angular; integrated REST APIs.
- Performed corrective maintenance and issue analysis on web interfaces.

SELECTED PROJECTS (GitHub)

Pet Adoption UI - github.com/Witch19/pet-adoption-ui

React, TypeScript, Tailwind, REST APIs, JWT

- Modern React UI with clean component structure and backend integration.

Billing UI - github.com/Witch19/billing-ui

React, TypeScript, forms, API-driven state

- Frontend focused on readable logic, validation, and maintainable UI flows.

Tienda de Frutas - github.com/Witch19/tienda_bnk

Full stack: Angular/TypeScript + .NET APIs

- End-to-end web solution demonstrating JS/TS frontend discipline and API consumption.

TECHNICAL SKILLS

JavaScript core: ES6+, async/await, Promises, closures, modules, DOM, error handling, debugging

Frameworks: React, Node.js, TypeScript; Angular; Vue (familiarity / learning)

Quality / writing: Code review mindset, bug hunting, edge cases, technical writing, structured feedback

Backend / APIs: REST APIs, JWT auth, Node.js services, SQL/NoSQL basics

Tools: Git/GitHub, Azure DevOps, Jira; AI pair-programming (Cursor, Copilot, ChatGPT)

Nice-to-have: No formal RLHF/data-labeling role yet; strong transfer from daily AI-assisted coding + QA-style debugging

EDUCATION

Technology Degree in Software Development - Universidad UTE

Mechatronics Engineering studies - Universidad UTE

LANGUAGES

Spanish: Native | **English:** Intermediate (comfortable writing technical explanations)
