

JOSELYN SAAVEDRA

Associate Frontend Developer | HTML | CSS | JavaScript | Responsive UI | Documentation

Quito, Ecuador | Fully remote | github.com/Witch19

+593 99 252 3644 | Josyts.js@gmail.com | linkedin.com/in/joselyn-saavedra-dev

PROFESSIONAL SUMMARY

Associate-level frontend developer with 2+ years building and maintaining clean, functional user interfaces with **HTML**, **CSS**, and **JavaScript** (plus TypeScript/React). Strong attention to detail translating requirements and mockups into reliable, responsive UIs. Experience fixing bugs, writing clear component documentation, and explaining technical concepts to non-engineering stakeholders. Self-managed and deadline-driven in fully remote work. Curious about the business logic behind on-screen data and motivated to turn complex information into clear interactive interfaces that support decision-making.

PROFESSIONAL EXPERIENCE

Vidortec / Vigatec Chile - Full-Stack Developer (Frontend focus)

October 2023 - Present | Fully remote (Ecuador / Chile)

- Build and maintain UIs with **HTML**, **CSS**, **JavaScript**, TypeScript, and React/Angular for internal and client-facing tools.
- Implement **responsive** designs that work across browsers and devices; improve UX based on stakeholder feedback.
- Turn requirements into clear interfaces; collaborate with technical and non-technical teammates.
- Debug issues found in testing; improve reliability and performance of frontend components.
- Draft **documentation** for components and flows so others can understand the underlying logic.
- Own tasks independently in a remote setup; meet delivery deadlines without heavy process overhead.

Advance Latam - Frontend Developer

June 2023 - August 2023 | Ecuador

- Built functional web interfaces from requirements using HTML/CSS/JavaScript and Angular; REST integration.
- Corrective UI maintenance; clear communication in agile teams.

SELECTED PROJECTS (GitHub)

Billing UI - github.com/Witch19/billing-ui

React, TypeScript, Tailwind CSS, forms & data-driven UI

- Clear interface for structured data entry and review; focus on readability and maintainable components.

Pet Adoption UI - github.com/Witch19/pet-adoption-ui

HTML/CSS/JS via React + TypeScript + Tailwind

- Responsive web app built from the ground up with reusable UI and API integration.

Tienda de Frutas - github.com/Witch19/tienda_bnk

TypeScript frontend + APIs

- Product-style UI demonstrating end-to-end web application structure.

TECHNICAL SKILLS

Core web: HTML5, CSS3, JavaScript; CSS frameworks (Tailwind); responsive / cross-browser UI

Also: TypeScript, React, Angular; REST APIs; Git; basic charting / dashboard UI patterns (learning deepening)

Working style: Documentation, code reviews, bug fixing, remote self-management, clear communication with non-technical stakeholders

Mindset: Detail-oriented, logical problem-solving, curiosity about business logic behind presented data

EDUCATION

Technology Degree in Software Development - Universidad UTE

LANGUAGES

Spanish: Native | **English:** Intermediate (comfortable documenting and explaining UI logic in writing)
