Gulf Associates

Re: Application for Associate Frontend Developer

Hello,

I am applying for the **Associate Frontend Developer** role at Gulf Associates. I build and maintain clean, responsive interfaces with **HTML, CSS, and JavaScript** (plus TypeScript/React), with strong attention to detail when turning requirements into reliable UI.

In my current remote role at Vidortec/Vigatec Chile, I collaborate with technical and non-technical stakeholders, fix bugs found in testing, document components clearly, and own delivery on deadlines. I am especially interested in making complex information easy to read on screen, so dashboards and tools actually support judgment, not just display data.

I would welcome contributing to your Amsterdam client engagement and learning the commercial logic behind the interfaces we ship. I am fully available for remote work and can manage tasks independently with clear, direct communication.

Selected work: <https://github.com/Witch19/billing-ui> | <https://github.com/Witch19/pet-adoption-ui>

Thank you for your time. I look forward to hearing from you.

Sincerely,

Joselyn Saavedra
