

JOSELYN SAAVEDRA

Node.js Developer | Backend Engineer | TypeScript · JavaScript

Quito, Ecuador

+593 99 252 3644 | Josyts.js@gmail.com | linkedin.com/in/joselyn-saavedra-dev

PROFESSIONAL SUMMARY

Full Stack Developer with a strong backend focus in **Node.js**, **TypeScript**, and **JavaScript**. Experienced in designing and implementing **REST APIs**, integrating services, and managing **SQL and NoSQL databases** (SQL Server, PostgreSQL, MongoDB). Proven track record supporting enterprise and fintech projects, including **Diners Club** card systems and corporate clients in Chile and Ecuador. Skilled in **Git**, **Azure DevOps**, **CI/CD pipelines**, automated testing, Bash scripting, and agile delivery. Committed to clean code, maintainability, and scalable solutions.

PROFESSIONAL EXPERIENCE

Vidortec / Vigatec Chile — Full Stack Developer (Backend-focused)

October 2023 – Present | Quito, Ecuador / Remote (Chile)

- Develop and maintain backend services with **Node.js** and **.NET** for corporate clients (Aguas Andinas, Fila), collaborating with distributed teams in Chile.
- Design, extend, and implement **REST APIs** and integrate frontend applications with backend services.
- Administer and query **SQL** (SQL Server, PostgreSQL) and **NoSQL** (MongoDB) databases.
- Manage source control, code reviews, and deployments using **Git**, **Azure DevOps**, **Azure Repos**, and **CI/CD** pipelines.
- Resolve incidents and defects in non-production and production environments.
- Automate operational tasks with **Bash** scripts to improve resource management and productivity.
- Support fintech implementations for **Diners Club**: credit/debit card testing, script validation, and configuration in Profile Manager and Configuration Manager.
- Produce technical documentation and follow engineering standards for maintainable, reusable code.

Advance Latam — Frontend Developer

June 2023 – August 2023 | Ecuador

- Built responsive web applications with JavaScript and integrated UI components with backend services.
- Managed tasks and tracked issues using **Jira** in an agile team environment.
- Participated in bug fixing, code reviews, and iterative feature delivery.

TECHNICAL SKILLS

Backend: Node.js, NestJS, JavaScript, TypeScript, .NET, REST APIs, Bash

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, LevelDB

Architecture: API design, service integration, modular and maintainable backend structures

Testing & QA: Functional testing, Karate, k6, debugging, troubleshooting

DevOps & Tools: Git, Azure DevOps, Azure Repos, CI/CD, Postman, VS Code, Jira

Practices: Agile/Scrum, clean code, code reviews, technical documentation, SOLID principles

Frontend (complementary): Angular, React, HTML5, CSS3

EDUCATION

Software Development Technology — Universidad UTE

Mechatronics Engineering — Universidad UTE

CERTIFICATIONS

- JavaScript — 180 hours (Intermediate Level)
- React — 80 hours (Develop Junior)

- Advanced Git — 40 hours
- Web Development Introduction: HTML & CSS — Google (300 hours)
- Ethical Hacking — 40 hours

LANGUAGES

Spanish: Native | **English:** Intermediate (professional reading & writing)
